

Facebook's Graph API

Adam Romriell
For Mrs. Powell's Bakery

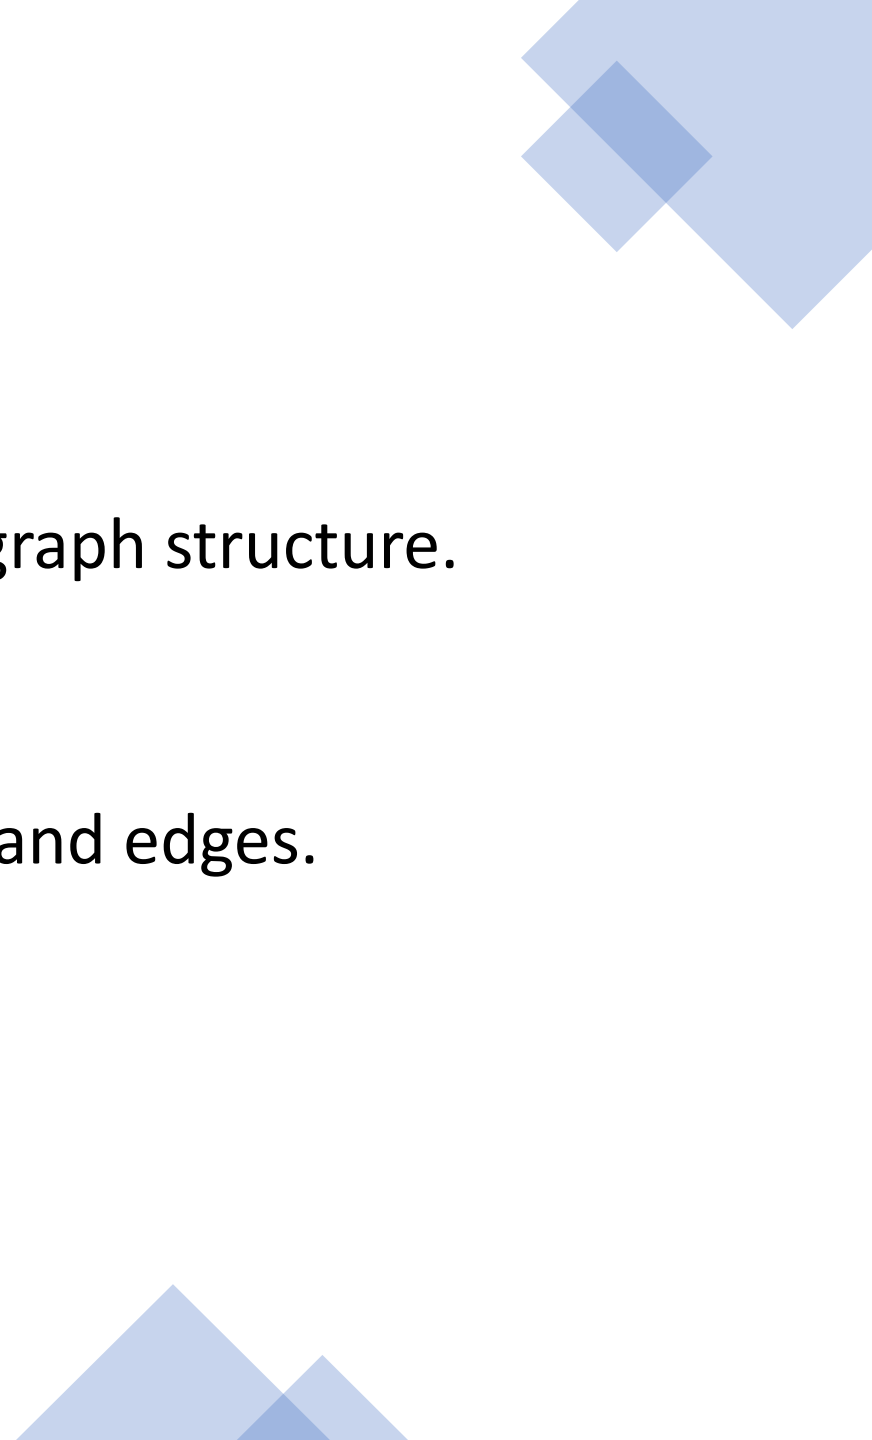

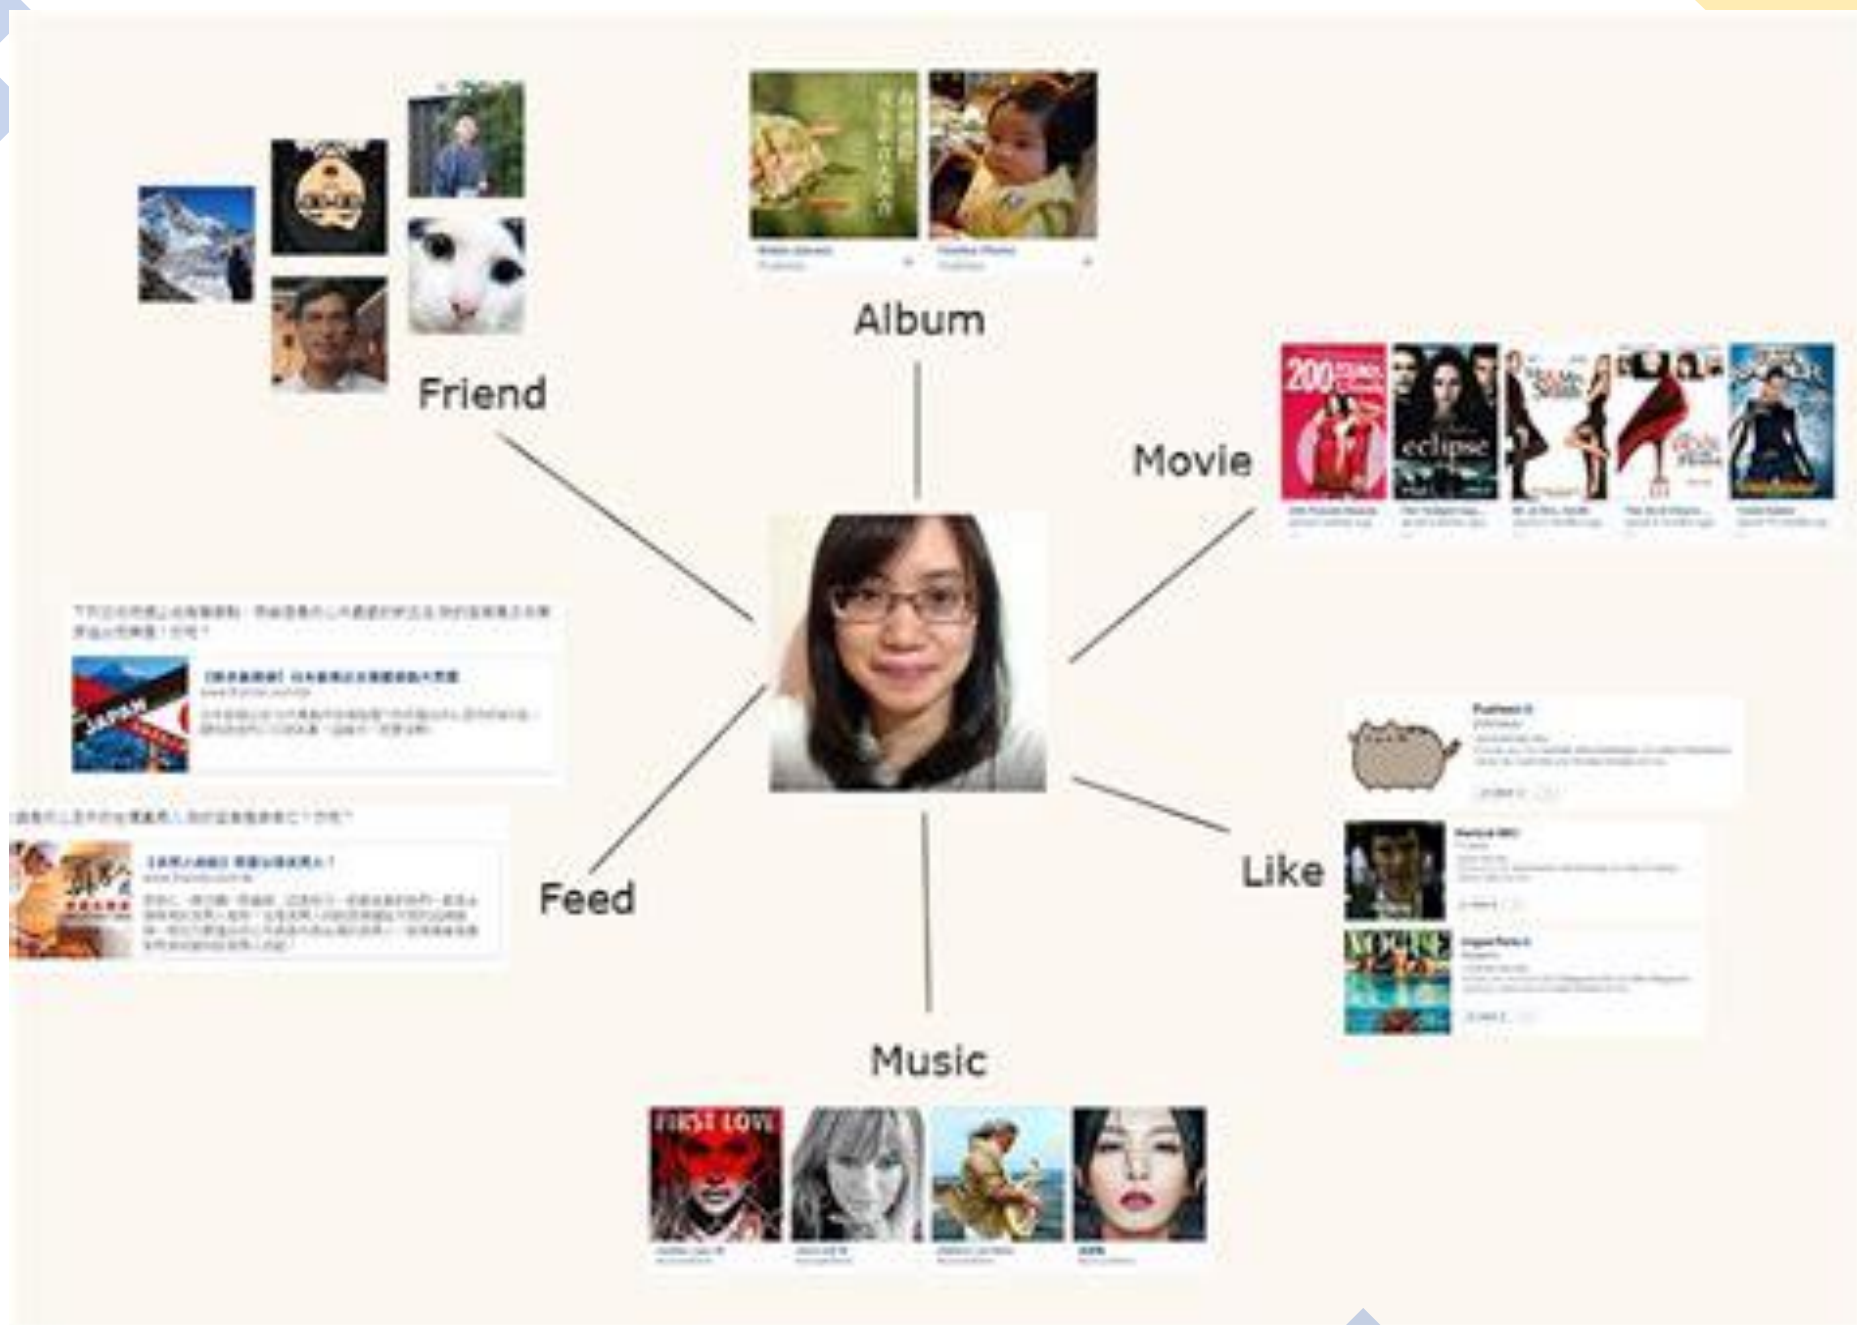

What is an API

- APIs are restaurants
 - Need to learn to talk to the different ‘waiters’
 - Data is the focus
- 

Facebook's API

- Facebook's API is graph structure.
 - Graphs are nodes and edges.
 - Nodes vs edges
- 

Accessing Information

1

Start with the
page node

2

Ask for the
relevant
information

3

Use edges to
comments on
posts, and likes

4

Count the
number of
comments and
likes on posts

Other Considerations

Each page
requires an API
key

Manually count
the comments
and likes
